

There are typically two issues that can affect access to the site <https://mwaonline.manionwilkins.com>

- Compatibility Mode (specific to IE 11)
- Pop-up blocker (any browser)

To enable compatibility mode for the site in IE 11

Either press **ALT + T** then **O** or click on the gear icon at the far right

Choose Compatibility View Settings then add “manionwilkins.com” to the list, do NOT put www or any other prefix in front of “manionwilkins.com”

To disable the pop-up blocker in IE 11

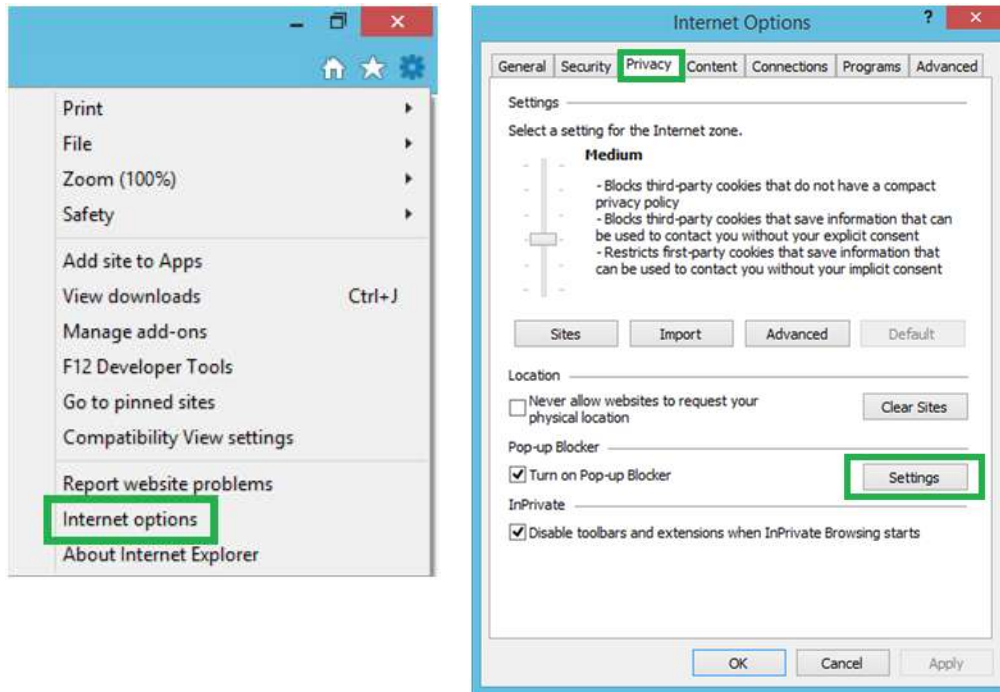

Internet explorer will typically give you a warning when it blocks a pop-up, you may use the menu options on this warning to set IE to "always allow" pop-ups from this site.

Alternatively you can add the site to the pop-up blocker allow list via menu options as shown below...

Either press **ALT + T** then **O** or click on the gear icon at the far right

Choose Internet Options > Privacy tab > Settings under Pop-up blocker

Add "manionwilkins.com" to the list, do NOT put www or any other prefix in front of "manionwilkins.com".
